Computer Science Project File

Bhavana Kumar

XII-A

Index

Certificate

This is to certify that the project entitled '**Helix**' has been submitted by Bhavana Kumar, a student of class XII-A for the academic session 2021-21. He has completed the project work under direct supervision of the undersigned as per the requirement for the Board Examination.

Acknowledgement

For the accomplishment of the project, I would like to take this opportunity to express gratitude to Mrs. Ruchi Arya who has been helping me in this project and supported us. It is to her I owe my deepest gratitude. It gives me immense pleasure in presenting the project **“Helix”.**

Thank You,

Bhavana Kumar

Requirements

- Hardware :
    - PC
    - Keyboard
    - Mouse
    - Printer
- Software :
    - IDLE(Python 3.8 64 bit)
    - Snipping tool
    - Word File
    - MySQL 5.5 Command Line Client

Libraries Imported

1. Pandas
2. Chatterbot

ABOUT ‘HELIX’

The given project is Helix Chatbot. It has been made using the libraries Chatterbot and Pandas. Helix Chatbot is a user friendly program that receives a query from the user and executes it by sourcing data from a CSV file and displays it. The CSV file has been formed using mysql.connector and hosts the data about 36 students and their marks. The Helix chatbot sources the data required from the CSV file by using simple commands from the user.

This makes the task easier for the user as he or she doesn’t have to scan through the data for a required value, they can simply use the Helix Chatbot using the student roll number or name.

The chatbot stores all its memory data in a MySQl database and this is done intentionally by the chatbot and doesn’t require any coding from the programmer and using the SQL Storage Adapter. It also uses the logic adapters ‘Best Match’, ’Mathematical Evaluation’ and ‘Law Confidence’ adapter set at threshold value operating system.

Simply, the Helix has been trained for particular queries to give the required data.

CODE

A) PYTHON

```
from chatterbot import ChatBot
from chatterbot.trainers import ChatterBotCorpusTrainer
from chatterbot.trainers import ListTrainer

#creating the chatbot with required logic adaptors
bot = ChatBot(
    'Terminal',
    storage_adapter='chatterbot.storage.SQLStorageAdapter',
    logic_adapters=[
            "chatterbot.logic.MathematicalEvaluation",
        {
            'import_path': 'chatterbot.logic.BestMatch'

        },
        {
            'import_path': 'chatterbot.logic.LowConfidenceAdapter',
            'threshold': 0.8,
            'default_response': 'I am sorry, but I do not understand.'
        }
    ],
    input_adapter="chatterbot.input.TerminalAdapter",
    output_adapter="chatterbot.output.TerminalAdapter"
)
import pandas as pd

# Importing the database
database = pd.read_csv('student.csv', sep=',')

rollno = database['Roll_No']
name = database['Name']
age = database['Age']
gender = database['Gender']
marks = database['Marks']
lowest_name = ''
lowest_rollno = ''
topper_name = ''
topper_rollno = ''
no_of_failures = 0
ppl_over_95=0
ppl_over_90=0
ppl_over_80=0

for i in range(0,len(marks)):

  if marks[i] == min(marks):
    lowest_name = name[i]
    lowest_rollno = rollno[i]
```

```
  if marks[i] == max(marks):
    topper_name =topper_name+','+name[i]

  if marks[i] <= 33 :
    no_of_failures = no_of_failures + 1

Hi, I'm Helix - The Chatbot
The sole reason Helix was made,
was to provide you with aid!

Ask me something!
hello
Hi

What is your name?
My name is Helix, the ChatBot! Here to help!

how can you help me?
I am your personal assistant, so I'll try my best to help you! I can solve any mathematical
equation, provide you with data from a database or even tell you a joke!

what do you eat?
Do you hate?

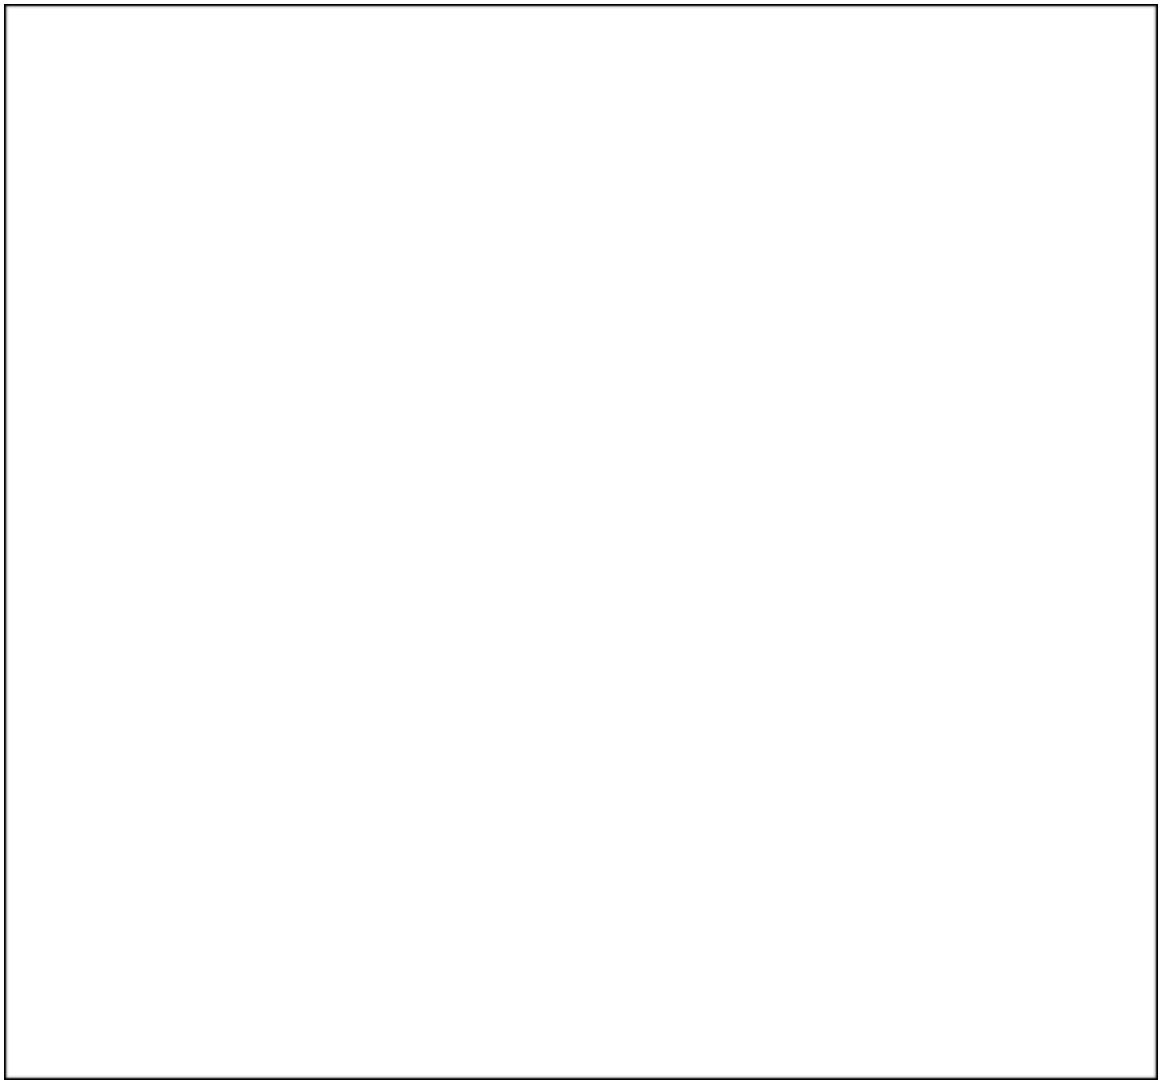
why can you not eat?
I am sorry, but I do not understand.

who are you?
Who? Who is but a form following the function of what

what are you?
I am but a man in a mask.

tell me a joke
Did you hear the one about the mountain goats in the andes? It was "ba a a a a a a d".

how are you?
I am doing well.
```



```
